

## CANMEDS

The CanMEDS 2015 Milestones Guide | Selected milestones

Editors: Jason R. Frank, Linda S. Snell, Jonathan Sherbino

In the progression through a physician's career, competencies acquired at a given stage are sustained and developed further through subsequent stages. Where a specific milestone for the acquisition of an enabling competency is not specified for a given stage, it should be assumed that earlier milestones for that competency still apply.

Throughout the CanMEDS 2015 Framework and Milestones Guide, reference to the patient's family are intended to include all those who are personally significant to the patient and are concerned with his or her care, including, according to the patient's circumstances, family members, partners, caregivers, legal guardians, and substitute decision-makers.

**Filters selected**

All roles

All stages

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Medical Expert</b>						
<b>5 Actively contribute, as an individual and as a member of a team providing care, to the continuous improvement of health care quality and patient safety</b>						
5.1 Recognize and respond to harm from health care delivery, including patient safety incidents	Define the types of patient safety incidents	Recognize the occurrence of a patient safety incident  Differentiate outcomes of medical conditions and diseases from complications related to the inherent risks of treatments and from patient safety incidents	Prioritize the initial medical response to harmful patient safety incident to mitigate further injury  Incorporate, as appropriate, into a differential diagnoses, harm from health care delivery	Participate in an analysis of patient safety incidents  Report patient safety incidents to appropriate institutional representatives  Recognize near-misses in real time and respond to correct them, preventing them from reaching the patient  Identify potential improvement opportunities arising from harmful patient safety incidents and near misses	Recognize and respond to harm from health care delivery, including patient safety incidents	Teach how to respond to harm from health care and improve bedside care

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Medical Expert</b>						
<b>3 Plan and perform procedures and therapies for the purpose of assessment and/or management</b>						
3.3 Prioritize a procedure or therapy, taking into account clinical urgency and available resources						Triage and schedule procedures in complex situations, demonstrating a collaborative approach when competing for limited resources
<b>5 Actively contribute, as an individual and as a member of a team providing care, to the continuous improvement of health care quality and patient safety</b>						
5.2 Adopt strategies that promote patient safety and address human and system factors	Describe the individual factors that can affect human performance, including sleep deprivation and stress  Describe system factors that can affect patient safety, including resource availability and physical and environmental factors	Describe common types of cognitive and affective bias  Describe the principles of situational awareness and their implications for medical practice	Use cognitive aids such as procedural checklists, structured communication tools, or care paths, to enhance patient safety  Describe strategies to address human and system factors on clinical practice	Apply the principles of situational awareness to clinical practice	Adopt strategies that promote patient safety and address human and system factors	Evaluate the impact of system changes on the provision of patient care  Design safety initiatives, including those that incorporate needs and metrics identified by patients and their families

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Medical Expert</b>						
<b>4 Establish plans for ongoing care and, when appropriate, timely consultation</b>						
4.1 Implement a patient-centred care plan that supports ongoing care, follow-up on investigations, response to treatment, and further consultation				Determine the necessity and appropriate timing of consultation		
<b>5 Actively contribute, as an individual and as a member of a team providing care, to the continuous improvement of health care quality and patient safety</b>						
5.1 Recognize and respond to harm from health care delivery, including patient safety incidents	Describe the scope and burden of health-care-related harm					
<b>3 Plan and perform procedures and therapies for the purpose of assessment and/or management</b>						
3.3 Prioritize a procedure or therapy, taking into account clinical urgency and available resources				Advocate for a patient's procedure or therapy on the basis of urgency and available resources	Prioritize a procedure or therapy, taking into account clinical urgency, potential for deterioration, and available resources	

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Medical Expert</b>						
3.4 Perform a procedure in a skilful and safe manner, adapting to unanticipated findings or changing clinical circumstances	Perform a simple procedure under direct supervision	Demonstrate effective procedural preparation, including the use of a pre-procedure time-out or safety checklist as appropriate  Set up and position the patient for a procedure	Perform common procedures in a skilful, fluid, and safe manner with minimal assistance  Seek assistance as needed when unanticipated findings or changing clinical circumstances are encountered	Competently perform discipline-specific procedures  Document procedures accurately	Perform procedures in a skilful and safe manner, adapting to unanticipated findings or changing clinical circumstances	Perform specialized procedures that extend beyond routine practice in the discipline
<b>4 Establish plans for ongoing care and, when appropriate, timely consultation</b>						
4.1 Implement a patient-centred care plan that supports ongoing care, follow-up on investigations, response to treatment, and further consultation	Describe the importance of follow-up in patient care		Ensure follow-up on results of investigation and response to treatment  Coordinate investigation, treatment, and follow-up plans when multiple physicians and health care professionals are involved	Establish plans for ongoing care, taking into consideration the patient's clinical state, circumstances, preferences, and actions, as well as available resources, best practices, and research evidence	Implement a patient-centred care plan that supports ongoing care, follow-up on investigations, response to treatment, and further consultation	Develop a novel system of follow-up that is flexible and adaptable to patients, families, and community resources

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Medical Expert</b>						
<b>3 Plan and perform procedures and therapies for the purpose of assessment and/or management</b>						
3.4 Perform a procedure in a skilful and safe manner, adapting to unanticipated findings or changing clinical circumstances				Establish and implement a plan for post-procedure care		Teach the procedures of the discipline to others
<b>2 Perform a patient-centred clinical assessment and establish a management plan</b>						
2.2 Elicit a history, perform a physical exam, select appropriate investigations, and interpret their results for the purpose of diagnosis and management, disease prevention, and health promotion						Conduct a clinical assessment when a second opinion is requested or when a high degree of diagnostic uncertainty has already been established
2.4 Establish a patient-centred management plan	Develop an initial management plan for common patient presentations		Develop and implement initial management plans for common problems in their discipline			

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Medical Expert</b>						
2.3 Establish goals of care in collaboration with patients and their families, which may include slowing disease progression, treating symptoms, achieving cure, improving function, and palliation	Initiate, under supervision, discussions with the patient and family about goals of care		<p>Address with the patient and family their ideas about the nature and cause of the health problem, fears and concerns, and expectations of health care professionals</p> <p>Work with the patient and family to understand relevant options for care</p>	<p>Share concerns, in a constructive and respectful manner, with the patient and family about goals of care that are not felt to be achievable</p> <p>Address the impact of the medical condition on the patient's ability to pursue life goals and purposes</p>	Establish goals of care in collaboration with the patient and family, which may include slowing disease progression, achieving cure, improving function, and palliation	
2.2 Elicit a history, perform a physical exam, select appropriate investigations, and interpret their results for the purpose of diagnosis and management, disease prevention, and health promotion				Focus the clinical encounter, performing it in a time-effective manner, without excluding key elements		

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Medical Expert</b>						
2.4 Establish a patient-centred management plan				Develop and implement management plans that consider all of the patient's health problems and context in collaboration with the patient and family and, when appropriate, the interdisciplinary team		
2.2 Elicit a history, perform a physical exam, select appropriate investigations, and interpret their results for the purpose of diagnosis and management, disease prevention, and health promotion	Develop a general differential diagnosis relevant to the patient's presentation  Elicit a history and perform a physical exam that informs the diagnosis		Develop a specific differential diagnosis relevant to the patient's presentation	Synthesize patient information to determine a diagnosis  Select and interpret appropriate investigations based on a differential diagnosis	Elicit a history, perform a physical exam, select appropriate investigations, and interpret their results for the purpose of diagnosis and management, disease prevention, and health promotion	Conduct a clinical assessment in challenging or unusual situations
2.1 Prioritize issues to be addressed in a patient encounter					Prioritize which issues need to be addressed during future visits or with other health care practitioners	

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Medical Expert</b>						
<b>3 Plan and perform procedures and therapies for the purpose of assessment and/or management</b>						
3.1 Determine the most appropriate procedures and therapies						Develop a novel procedure or therapy while respecting ethical standards for experimentation
3.3 Prioritize a procedure or therapy, taking into account clinical urgency and available resources		Recognize and discuss the importance of the triaging and timing of a procedure or therapy	Advocate for the timely execution of a patient procedure or therapy	Triage a procedure or therapy, taking into account clinical urgency, potential for deterioration, and available resources		
3.2 Obtain and document informed consent, explaining the risks and benefits of, and the rationale for, a proposed procedure or therapy	Describe the ethical principles and legal process of obtaining and documenting informed consent		Obtain informed consent for commonly performed procedures and therapies, under supervision	Use shared decision-making in the consent process, taking risk and uncertainty into consideration	Obtain and document informed consent, explaining the risks and benefits of, and the rationale for, a proposed procedure or therapy	
3.1 Determine the most appropriate procedures and therapies			Describe to patients common procedures or therapies for common conditions in their discipline	Integrate planned procedures or therapies into global assessment and management plans		

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Medical Expert</b>						
<b>2 Perform a patient-centred clinical assessment and establish a management plan</b>						
2.1 Prioritize issues to be addressed in a patient encounter				Consider clinical urgency, feasibility, availability of resources, and comorbidities in determining priorities to be addressed during the current encounter or during future visits or with other health care practitioners		
<b>3 Plan and perform procedures and therapies for the purpose of assessment and/or management</b>						
3.1 Determine the most appropriate procedures and therapies			Describe the indications, contraindications, risks, and alternatives for a given procedure or therapy	Integrate all sources of information to develop a procedural or therapeutic plan that is safe, patient-centred, and considers the risks and benefits of all approaches	Determine the most appropriate procedures or therapies for the purpose of assessment and/or management	

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Medical Expert</b>						
<b>2 Perform a patient-centred clinical assessment and establish a management plan</b>						
2.4 Establish a patient-centred management plan			<p>Discuss with the patient and family the degree of uncertainty inherent in all clinical situations</p> <p>Ensure that the patient and family are informed about the risks and benefits of each treatment option in the context of best evidence and guidelines</p>	Develop, in collaboration with the patient and family, a plan to deal with clinical uncertainty	Establish a patient-centred management plan	Establish management plans in patient encounters when there are significant disagreements about what is achievable
<b>1 Practise medicine within their defined scope of practice and expertise</b>						
1.3 Apply knowledge of the clinical and biomedical sciences relevant to their discipline	Apply knowledge of biomedical and clinical sciences to identify, diagnose, and address common clinical problems					
1.4 Perform appropriately timed clinical assessments with recommendations that are presented in an organized manner	Perform a patient assessment and provide an interpretation of the clinical situation to the supervising physician		Perform focused clinical assessments with recommendations that are well-documented	Perform clinical assessments that address the breadth of issues in each case	Perform appropriately timed clinical assessments addressing the breadth of the discipline with recommendations that are well organized and properly documented in written and/or oral form	Develop system-level processes to facilitate appropriately timed clinical assessments

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Medical Expert</b>						
1.3 Apply knowledge of the clinical and biomedical sciences relevant to their discipline			Apply clinical and biomedical sciences to manage core patient presentations in their discipline		Apply a broad base and depth of knowledge in clinical and biomedical sciences to manage the breadth of patient presentations in their discipline	Provide expert opinion to advise government or other organizations or to provide expert legal testimony  Teach aspects of their discipline to other physicians and health care professionals
1.4 Perform appropriately timed clinical assessments with recommendations that are presented in an organized manner			Recognize urgent problems that may need the involvement of more experienced colleagues and seek their assistance immediately			
1.2 Integrate the CanMEDS Intrinsic Roles into their practice of medicine	Describe the CanMEDS Roles and explain how they relate to the practice of medicine	Explain how the Intrinsic Roles need to be integrated into the practice of their discipline to deliver optimal patient care			Integrate the CanMEDS Intrinsic Roles into their practice of medicine	Teach and assess the application of the CanMEDS Competency Framework to medical practice
1.1 Demonstrate a commitment to high-quality care of their patients			Demonstrate compassion for patients	Under supervision, demonstrate commitment and accountability for patients in their care	Demonstrate a commitment to high-quality care of their patients	Role-model a commitment to high-quality patient care

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Medical Expert</b>						
1.6 Recognize and respond to the complexity, uncertainty, and ambiguity inherent in medical practice	Recognize that there is a degree of uncertainty in all clinical decision-making					
<b>2 Perform a patient-centred clinical assessment and establish a management plan</b>						
2.1 Prioritize issues to be addressed in a patient encounter	Identify the concerns and goals of the patient and family* for the encounter		Iteratively establish priorities, considering the perspective of the patient and family (including values and preferences) as the patient's situation evolves			
<b>1 Practise medicine within their defined scope of practice and expertise</b>						
1.6 Recognize and respond to the complexity, uncertainty, and ambiguity inherent in medical practice		Identify clinical situations in which complexity, uncertainty, and ambiguity may play a role in decision-making	Develop a plan that considers the current complexity, uncertainty, and ambiguity in a clinical situation	Seek assistance in situations that are complex or new  Adapt care as the complexity, uncertainty, and ambiguity of the patient's clinical situation evolves	Recognize and respond to the complexity, uncertainty, and ambiguity inherent in medical practice	Teach about complexity and clinical care

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Medical Expert</b>						
1.1 Demonstrate a commitment to high-quality care of their patients	As a learner in the clinical environment, demonstrate a duty of care toward patients					
1.5 Carry out professional duties in the face of multiple, competing demands	Recognize competing demands in professional duties and seek assistance in determining priorities		On the basis of patient-centred priorities, seek assistance to prioritize multiple competing tasks that need to be addressed	Prioritize patients on the basis of clinical presentations  Maintain a duty of care and patient safety while balancing multiple responsibilities	Carry out professional duties in the face of multiple, competing demands	Teach and role-model how to prioritize professional duties
1.4 Perform appropriately timed clinical assessments with recommendations that are presented in an organized manner						Use technology to facilitate consultation for patients who may have limited or delayed access to care  Teach colleagues how to perform consultations

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Communicator</b>						
1.4 Respond to a patient's non-verbal behaviours to enhance communication	Describe how to utilize non-verbal communication to build rapport	Use appropriate non-verbal communication to demonstrate attentiveness, interest, and responsiveness to the patient and family				
1.5 Manage disagreements and emotionally charged conversations	Describe physician, patient, and contextual factors that lead to strong emotions  Describe how strong emotions may affect the patient-physician interaction  Critically reflect upon emotional encounters and identify how different approaches may have affected the interaction		Recognize when personal feelings in an encounter are valuable clues to the patient's emotional state	Recognize when strong emotions (such as, anger, fear, anxiety, or sadness) are affecting an interaction and respond appropriately  Establish boundaries as needed in emotional situations	Manage disagreements and emotionally charged conversations	Teach others to anticipate, recognize, and manage emotions in routine clinical encounters
1.6 Adapt to the unique needs and preferences of each patient and to his or her clinical condition and circumstances	Describe models of decision-making along the spectrum from "paternalistic" to "shared" to "autonomous"		Assess a patient's decision-making capacity	Tailor approaches to decision-making to patient capacity, values, and preferences	Adapt to the unique needs and preferences of each patient and to his or her clinical condition and circumstances	Teach others to tailor approaches to decision-making to patient capacity, values, and preferences

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Communicator</b>						
1.4 Respond to a patient's non-verbal behaviours to enhance communication	Identify non-verbal communication from a patient and family and its impact on physician-patient communication	Identify, verify, and validate non-verbal cues on the part of patients and their families		Respond to patients' non-verbal communication and use appropriate non-verbal behaviours to enhance communication with patients		Demonstrate advanced non-verbal communication skills in difficult situations
1.3 Recognize when the values, biases, or perspectives of patients, physicians, or other health care professionals may have an impact on the quality of care, and modify the approach to the patient accordingly	Describe how patient and physician values, biases, and perspectives can affect clinical encounters			Recognize when the values, biases, or perspectives of patients, physicians, or other health care professionals may have an impact on the quality of care, and modify the approach to the patient accordingly		Teach learners to recognize situations in which patient and physician values, biases, or preferences may threaten the quality of care, and how to modify the approach to patient care
1.2 Optimize the physical environment for patient comfort, dignity, privacy, engagement, and safety	Describe elements of the physical environment that affect patient comfort, dignity, privacy, engagement, and safety	Mitigate physical barriers to communication to optimize patient comfort, dignity, privacy, engagement, and safety	Optimize the physical environment for patient comfort, dignity, privacy, engagement, and safety			Participate in institutional/system initiatives to improve the physical environment for patients

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Communicator</b>						
1.1 Communicate using a patient-centred approach that encourages patient trust and autonomy and is characterized by empathy, respect, and compassion	<p>Outline the evidence that effective physician–patient communication enhances patient and physician outcomes</p> <p>Describe the key components of a patient-centred approach to medical care</p>	<p>Communicate using a patient-centred approach that facilitates patient trust and autonomy and is characterized by empathy, respect, and compassion</p>				<p>Teach and assess the patient-centred approach to communication</p>
<b>5 Document and share written and electronic information about the medical encounter to optimize clinical decision-making, patient safety, confidentiality, and privacy</b>						
5.3 Share information with patients and others in a manner that respects patient privacy and confidentiality and enhances understanding	<p>Describe the different levels of written and electronic health literacy of patients and their implications for patient care</p> <p>Describe the advantages, limitations and risks of using electronic communication directly with patients (including telehealth) and strategies to reduce these risks</p>				<p>Share information with patients and others in a manner that respects patient privacy and confidentiality and enhances understanding</p>	<p>Teach others, including patients, how to use electronic communication effectively and safely to protect confidentiality</p>

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Communicator</b>						
<b>4 Engage patients and their families in developing plans that reflect the patient's health care needs and goals</b>						
4.3 Use communication skills and strategies that help patients and their families make informed decisions regarding their health	Describe elements of informed consent					
<b>5 Document and share written and electronic information about the medical encounter to optimize clinical decision-making, patient safety, confidentiality, and privacy</b>						
5.1 Document clinical encounters in an accurate, complete, timely, and accessible manner, in compliance with regulatory and legal requirements	Describe the functions and principal components of a medical record	Organize information in appropriate sections within an electronic or written medical record	Document information about patients and their medical conditions in a manner that enhances intra-and interprofessional care	Adapt record keeping to the specific guidelines of their discipline and the clinical context	Document clinical encounters in an accurate, complete, timely and accessible manner, and in compliance with legal and privacy requirements	
<b>4 Engage patients and their families in developing plans that reflect the patient's health care needs and goals</b>						
4.3 Use communication skills and strategies that help patients and their families make informed decisions regarding their health		Demonstrate steps to obtaining informed consent	Answer questions from the patient and family about next steps		Use communication skills and strategies that help the patient and family make informed decisions regarding their health	

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Communicator</b>						
<b>5 Document and share written and electronic information about the medical encounter to optimize clinical decision-making, patient safety, confidentiality, and privacy</b>						
5.1 Document clinical encounters in an accurate, complete, timely, and accessible manner, in compliance with regulatory and legal requirements						Teach or conduct peer review and practice assessment regarding record keeping practices
<b>4 Engage patients and their families in developing plans that reflect the patient's health care needs and goals</b>						
4.2 Assist patients and their families to identify, access, and make use of information and communication technologies to support their care and manage their health	Describe the various technologies and information sources available to enhance patients' understanding and management of their health care				Assist the patient and family to identify, access, and make use of information and communication technologies to support care and manage health	Contribute to the development of communication resources and technologies to enhance patient care and medical knowledge
4.1 Facilitate discussions with patients and their families in a way that is respectful, non-judgmental, and culturally safe	Describe steps for conducting an interview with a translator Conduct culturally safe interviews with close supervision Demonstrate interviewing techniques for encouraging discussion, questions, and interaction		Communicate with cultural awareness and sensitivity			Teach others and assess their ability to engage patients in a way that is respectful and non-judgmental and that provides cultural safety

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Communicator</b>						
<b>5 Document and share written and electronic information about the medical encounter to optimize clinical decision-making, patient safety, confidentiality, and privacy</b>						
5.1 Document clinical encounters in an accurate, complete, timely, and accessible manner, in compliance with regulatory and legal requirements	Include as appropriate in the medical record the patient's narrative* of the illness experience					
5.3 Share information with patients and others in a manner that respects patient privacy and confidentiality and enhances understanding	Describe the principles and legal requirements for privacy and confidentiality of written and electronic communication	Assess patients' needs and preferences with respect to methods of information sharing		Adapt written and electronic communication to the specificity of the discipline and to the expectations of patients		
5.2 Communicate effectively using a written health record, electronic medical record, or other digital technology			Demonstrate reflective listening, open-ended inquiry, empathy, and effective eye contact while using a written or electronic medical record	Adapt use of the health record to the patient's health literacy and the clinical context	Communicate effectively using a written health record, electronic medical record, or other digital technology	Build reminders and clinical practice guidelines into the health record to enhance care  Teach others how to effectively communicate with patients while using a medical record

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Communicator</b>						
<b>4 Engage patients and their families in developing plans that reflect the patient’s health care needs and goals</b>						
4.1 Facilitate discussions with patients and their families in a way that is respectful, non-judgmental, and culturally safe					Facilitate discussions with the patient and family in a way that is respectful, non-judgmental, and culturally safe	
<b>5 Document and share written and electronic information about the medical encounter to optimize clinical decision-making, patient safety, confidentiality, and privacy</b>						
5.1 Document clinical encounters in an accurate, complete, timely, and accessible manner, in compliance with regulatory and legal requirements	Document the essential elements of a clinical encounter using a structured approach  Identify potential difficulties and errors in medical record keeping that have a negative impact on patient care or patient safety  Describe the regulatory and legal requirements, including privacy legislation, for record keeping	Maintain accurate and up-to-date problem lists and medication lists	Document clinical encounters to adequately convey clinical reasoning and the rationale for decisions	Identify and correct vague or ambiguous documentation		Use medical record review to assess trainee clinical reasoning and their understanding of their patients as persons

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Communicator</b>						
<b>2 Elicit and synthesize accurate and relevant information, incorporating the perspectives of patients and their families</b>						
2.1 Use patient-centred interviewing skills to effectively gather relevant biomedical and psychosocial information				Integrate, summarize, and present the biopsychosocial information obtained from a patient-centred interview		
<b>3 Share health care information and plans with patients and their families</b>						
3.1 Share information and explanations that are clear, accurate, and timely, while checking for patient and family understanding	Describe the ethical principles of truth-telling in the physician–patient relationship	Communicate the diagnosis, prognosis and plan of care in a clear, compassionate, respectful, and accurate manner to the patient and family				
<b>2 Elicit and synthesize accurate and relevant information, incorporating the perspectives of patients and their families</b>						
2.3 Seek and synthesize relevant information from other sources, including the patient’s family, with the patient’s consent	Describe potential sources of information that may assist in a given patient’s care		Seek and synthesize relevant information from other sources, including the patient’s family, with the patient’s consent			

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Communicator</b>						
2.2 Provide a clear structure for and manage the flow of an entire patient encounter	Conduct a patient encounter using an organizing framework		Conduct a focused and efficient patient interview, managing the flow of the encounter while being attentive to the patient's cues and responses	Manage the flow of challenging patient encounters, including those with angry, distressed, or excessively talkative individuals	Provide a clear structure for and manage the flow of an entire patient encounter	
<b>3 Share health care information and plans with patients and their families</b>						
3.1 Share information and explanations that are clear, accurate, and timely, while checking for patient and family understanding			Use strategies to verify and validate the understanding of the patient and family with regard to the diagnosis, prognosis, and management plan			

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Communicator</b>						
<b>2 Elicit and synthesize accurate and relevant information, incorporating the perspectives of patients and their families</b>						
2.1 Use patient-centred interviewing skills to effectively gather relevant biomedical and psychosocial information	<p>Conduct a patient-centred interview under supervision, gathering relevant biomedical and psychosocial information in the context of an uncomplicated presentation of a common medical problem</p> <p>Describe the basic elements of the patient-centred interview</p>		<p>Integrate and synthesize information about the patient's beliefs, values, preferences, context and expectations with biomedical and psychosocial information</p> <p>Conduct a patient-centred interview, gathering all relevant biomedical and psychosocial information for any clinical presentation</p>	Actively listen and respond to patient cues	Use patient-centred interviewing skills to effectively gather relevant biomedical and psychosocial information	Intervene when, during the patient interview, a learner or health care professional ignores the patient's beliefs, values, preferences, context, or expectations
<b>1 Establish professional therapeutic relationships with patients and their families</b>						
1.6 Adapt to the unique needs and preferences of each patient and to his or her clinical condition and circumstances	Assess and appropriately address the patient's preferred involvement in decisions about care					
<b>3 Share health care information and plans with patients and their families</b>						
3.2 Disclose harmful patient safety incidents to patients and their families accurately and appropriately					Disclose patient safety incidents to the patient and family accurately and appropriately	

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Communicator</b>						
<b>4 Engage patients and their families in developing plans that reflect the patient’s health care needs and goals</b>						
4.1 Facilitate discussions with patients and their families in a way that is respectful, non-judgmental, and culturally safe	Describe the principles of cross-cultural interviewing	Conduct an interview, demonstrating cultural awareness	Explore the perspectives of the patient and others when developing care plans			
<b>3 Share health care information and plans with patients and their families</b>						
3.2 Disclose harmful patient safety incidents to patients and their families accurately and appropriately				Apologize appropriately for a harmful patient safety incident	Plan and document follow-up to harmful patient safety incident	Contribute to the improvement of the system of disclosure for patient safety incidents  Conduct peer review and practice assessments related to unexpected clinical outcomes and patient safety incidents  Lead disclosure teams
<b>1 Establish professional therapeutic relationships with patients and their families</b>						
1.6 Adapt to the unique needs and preferences of each patient and to his or her clinical condition and circumstances	Describe the importance of capacity assessment					

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Communicator</b>						
<b>3 Share health care information and plans with patients and their families</b>						
3.2 Disclose harmful patient safety incidents to patients and their families accurately and appropriately	Describe the ethical, professional, and legal obligations, and policies for, disclosure and reporting of patient safety incidents	Describe the steps in providing disclosure after a patient safety incident		Communicate the reasons for unanticipated clinical outcomes to patients and disclose patient safety incidents		
3.1 Share information and explanations that are clear, accurate, and timely, while checking for patient and family understanding		Recognize when to seek help in providing clear explanations to the patient and family		<p>Convey information related to the patient's health status, care, and needs in a timely, honest, and transparent manner</p> <p>Provide information on diagnosis and prognosis in a clear, compassionate, respectful, and objective manner</p>	Communicate clearly with patients and others in the setting of ethical dilemmas	

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Collaborator</b>						
<b>2 Work with physicians and other colleagues in the health care professions to promote understanding, manage differences, and resolve conflicts</b>						
2.2 Implement strategies to promote understanding, manage differences, and resolve conflicts in a manner that supports a collaborative culture			Listen to understand and find common ground with collaborators			
2.1 Show respect toward collaborators		Convey information thoughtfully				
2.2 Implement strategies to promote understanding, manage differences, and resolve conflicts in a manner that supports a collaborative culture	Describe different approaches to promote understanding and manage differences  List factors that contribute to misunderstandings, differences, and conflicts in the health care setting		Identify communication barriers between health care professionals	Analyze team dynamics  Gather the information and resources needed to manage differences and resolve conflicts among collaborators	Implement strategies to promote understanding, manage differences, and resolve conflicts in a manner that supports a collaborative culture	Teach conflict resolution in health care  Act as a consultant to physicians and other health care professionals in the promotion of a culture of collaboration
2.1 Show respect toward collaborators		Respond to requests and feedback in a respectful and timely manner	Actively listen to and engage in interactions with collaborators	Delegate tasks and responsibilities in an appropriate and respectful manner	Show respect toward collaborators	

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Collaborator</b>						
2.2 Implement strategies to promote understanding, manage differences, and resolve conflicts in a manner that supports a collaborative culture			Communicate clearly and directly to promote understanding, manage differences, and resolve conflicts	Gain consensus among colleagues in resolving conflicts		
<b>3 Hand over the care of a patient to another health care professional to facilitate continuity of safe patient care</b>						
3.1 Determine when care should be transferred to another physician or health care professional	Describe how scope of practice can trigger transfer of care  Describe common transitions in health care and the process of safe transfer of care		Identify patients requiring handover to other physicians or health care professionals		Determine when care should be transferred to another physician or health care professional

1.3 Engage in respectful shared decision-making with physicians and other colleagues in the health care professions				Communicate effectively with physicians and other colleagues in the health care professions		

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Leader</b>						
1.1 Apply the science of quality improvement to contribute to improving systems of patient care						Engage physicians and other health care professionals to collaborate in improving systems of patient care
1.2 Contribute to a culture that promotes patient safety	Describe the features of a “just culture” approach to patient safety			Actively encourage all involved in health care, regardless of their role, to report and respond to unsafe situations  Engage patients and their families in the continuous improvement of patient safety  Model a just culture to promote openness and increased reporting	Contribute to a culture that promotes patient safety	Promote a health care culture that enhances safety and quality  Evaluate the culture of an institution or group with respect to patient safety and health quality  Champion a just culture to enhance patient safety
1.3 Analyze safety incidents to enhance systems of care	Describe the elements of the health care system that facilitate or protect against patient safety incidents	Describe the available supports for patients and health care professionals when patient safety incidents occur			Analyze harmful patient safety incidents and near misses to enhance systems of care	Implement systems-level improvements in processes for identification of and response to patient safety hazards and patient safety incidents

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Leader</b>						
1.1 Apply the science of quality improvement to contribute to improving systems of patient care	<p>Describe the domains of health care quality</p> <p>Describe a patient's longitudinal experience through the health care system</p> <p>Describe the relevance of system theories in health care</p>	Describe quality improvement methodologies	<p>Seek data to inform practice and engage in an iterative process of improvement</p> <p>Compare and contrast systems theory with traditional approaches to quality improvement</p> <p>Compare and contrast the traditional methods of research design with those of improvement science</p>	<p>Participate in a patient safety and/or quality improvement initiative</p> <p>Analyze and provide feedback on processes seen in one's own practice, team, organization, or system</p>	Apply the science of quality improvement to contribute to improving systems of patient care	<p>Teach quality improvement science</p> <p>Apply the science of complexity to the improvement of health care</p> <p>Design processes to mitigate the impact of human and system factors on performance</p> <p>Lead quality improvement initiatives</p>
<b>4 Manage their practice and career</b>						
4.1 Set priorities and manage time to integrate practice and personal life			Build relationships with mentors			
4.2 Manage career planning, finances, and health human resources in a practice	Prioritize career path options on the basis of personal strengths and goals, the needs of society, and current and projected workforce needs	Review opportunities for practice preparation, including choices available for further training				

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Leader</b>						
4.1 Set priorities and manage time to integrate practice and personal life	Demonstrate time management skills		Organize work using strategies that address strengths and identify areas to improve in personal effectiveness		Set priorities and manage time to integrate practice and personal life	Mentor others Teach and assess time and personal management skills Adjust priorities to enable participation in clinical care, the profession, and institutional, provincial, national, or international activities
4.2 Manage career planning, finances, and health human resources in a practice			Examine personal interests and seek career mentorship and counselling			
4.1 Set priorities and manage time to integrate practice and personal life	Reflect on and set personal, educational, and professional goals	Align priorities with expectations for professional practice				

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Leader</b>						
<b>3 Demonstrate leadership in professional practice</b>						
3.2 Facilitate change in health care to enhance services and outcomes	Describe a recent local or national health system change and the basis for acceptance or resistance to this change  Describe the key issues regarding the need to improve health care delivery and the role of physician leadership in this improvement		Describe key health policy and organizational issues in their discipline	Analyze ongoing changes occurring in health care delivery		Provide consultative advice from a physician perspective to institutional managers and policy-makers  Lead a multidisciplinary team to implement a change in health care delivery
<b>4 Manage their practice and career</b>						
4.2 Manage career planning, finances, and health human resources in a practice				Plan practice finances, considering short- and long-term goals		

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Leader</b>						
4.3 Implement processes to ensure personal practice improvement	Manage a personal schedule using tools and technologies	Describe how practice standardization can improve quality of health care		Improve personal practice by evaluating a problem, setting priorities, executing a plan, and analyzing the results	Implement processes to ensure personal practice improvement	Develop systems to optimize practice management, including the use of checklists, prompts, and standard operating procedures  Solicit feedback and external practice audits to drive practice improvement  Engage others to develop a culture of continuous practice improvement  Engage regulatory bodies, medical associations, and specialty societies to improve standards of practice
<b>1 Contribute to the improvement of health care delivery in teams, organizations, and systems</b>						
1.4 Use health informatics to improve the quality of patient care and optimize patient safety				Map the flow of information in the care of their patients and suggest changes for quality improvement and patient safety		

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Leader</b>						
<b>4 Manage their practice and career</b>						
4.2 Manage career planning, finances, and health human resources in a practice		Maintain a portfolio and reflect professional development		<p>Describe remuneration models as they pertain to their discipline</p> <p>Adjust educational experiences to gain competencies necessary for future independent practice</p> <p>Reconcile expectations for practice with job opportunities and workforce needs</p>	Manage a career and a practice	<p>Align practice with career goals and opportunities</p> <p>Hire health care professionals according to defined capabilities</p> <p>Teach others about career and financial planning</p>
<b>2 Engage in the stewardship of health care resources</b>						
2.1 Allocate health care resources for optimal patient care	<p>Analyze how practice-related decisions affect service utilization and health-system sustainability</p> <p>Describe the ethical issues related to resource stewardship in health care</p>		<p>Describe models for resource stewardship in health care used at the institutional level</p> <p>Consider costs when choosing care options</p>	<p>Develop practice-based and system-based rules for resource allocation</p> <p>Use clinical judgment to minimize wasteful practices</p>	Allocate health care resources for optimal patient care	<p>Experiment with care delivery models that may improve care, value, or efficiency</p> <p>Assess performance of learners in providing high-value care</p>

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Leader</b>						
<b>3 Demonstrate leadership in professional practice</b>						
3.2 Facilitate change in health care to enhance services and outcomes				Develop a strategy for implementing change in health care with patients, physicians, and other health care professionals		
<b>2 Engage in the stewardship of health care resources</b>						
2.1 Allocate health care resources for optimal patient care	Describe the differences between cost, efficacy, and value with respect to health care delivery	Describe the costs of common diagnostic and therapeutic interventions relevant to their discipline				
<b>1 Contribute to the improvement of health care delivery in teams, organizations, and systems</b>						
1.4 Use health informatics to improve the quality of patient care and optimize patient safety		Describe the data available from health information systems in their discipline to optimize patient care		Use data on measures of clinical performance during team discussions and to support team decision-making	Use health informatics to improve the quality of patient care and optimize patient safety	<p>Compare service delivery data to accepted targets or goals</p> <p>Engage others in the adoption and refinement of health information technology for quality improvement</p> <p>Participate in systems-based informatics development and improvement</p>

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Leader</b>						
<b>2 Engage in the stewardship of health care resources</b>						
2.2 Apply evidence and management processes to achieve cost-appropriate care			Apply evidence and guidelines with respect to resource utilization in common clinical scenarios			
<b>3 Demonstrate leadership in professional practice</b>						
3.2 Facilitate change in health care to enhance services and outcomes	Compare and contrast the Canadian health care system with other models around the world		Analyze patient feedback to help improve patient experiences and clinical outcomes		Facilitate change in health care to enhance services and outcomes	
3.1 Demonstrate leadership skills to enhance health care	Describe how self-awareness, self-reflection, and self-management are important to developing leadership skills	Analyze their own leadership styles, including strengths, weaknesses, and biases		Contribute to a health care change initiative	Demonstrate leadership skills to enhance health care	Provide mentorship and guidance to help others develop leadership skills

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Leader</b>						
<b>2 Engage in the stewardship of health care resources</b>						
2.2 Apply evidence and management processes to achieve cost-appropriate care	Describe how evidence-informed medicine can be applied to optimize health care resource allocation  Discuss strategies to overcome the personal, patient, and organizational factors that lead to waste of health care resources			Optimize practice patterns for cost-effectiveness and cost control  Determine cost discrepancies between best practice and their current practice	Apply evidence and management processes to achieve cost-appropriate care	Analyze a proposed practice innovation to determine its cost impact in the clinical microsystem  Engage health care administration and leadership to reduce waste  Compare utilization data within and outside their institution to revise processes that are inefficient or unnecessary
<b>3 Demonstrate leadership in professional practice</b>						
3.1 Demonstrate leadership skills to enhance health care	Describe leadership styles as they relate to health care					

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Health Advocate</b>						
<b>1 Respond to an individual patient's health needs by advocating with the patient within and beyond the clinical environment</b>						
1.2 Work with patients and their families to increase opportunities to adopt healthy behaviours	Describe the value and limitations of promoting healthy behaviours	Identify resources or agencies that address the health needs of patients				
1.1 Work with patients to address determinants of health that affect them and their access to needed health services or resources	Describe the health care system, identifying obstacles patients and families face in obtaining health care resources  Define determinants of health and explain their implications  Describe the role of physicians and other health care professionals in patient advocacy	Analyze a given patient's needs for health services or resources related to the scope of their discipline	Demonstrate an approach to working with patients to advocate for health services or resources	Facilitate timely patient access to health services and resources	Work with patients to address the determinants of health that affect them and their access to needed health services or resources	Champion the development, implementation, and promotion of health advocacy teaching  Advocate to administrative or governing bodies on behalf of patients
1.2 Work with patients and their families to increase opportunities to adopt healthy behaviours				Apply the principles of behaviour change during conversations with patients about adopting healthy behaviours		

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Health Advocate</b>						
<b>2 Respond to the needs of the communities or populations they serve by advocating with them for system-level change in a socially accountable manner</b>						
2.3 Contribute to a process to improve health in the community or population they serve			Partner with others to identify the health needs of a community or population they serve	Distinguish between the potentially competing health interests of the individuals, communities, and populations they serve  Appraise available resources to support the health needs of communities or populations they serve	Contribute to a process to improve health in the communities or populations they serve	Partner with others to support, plan, or lead the implementation of a program to improve the health of the communities or populations they serve
2.2 Improve clinical practice by applying a process of continuous quality improvement to disease prevention, health promotion, and health surveillance activities		Participate in health promotion and disease prevention programs relevant to their practice	Identify patients or populations that are not being optimally served in their clinical practice	Report epidemics or clusters of unusual cases seen in practice, balancing patient confidentiality with duty to protect the public's health	Improve clinical practice by applying a process of continuous quality improvement to disease prevention, health promotion, and health surveillance activities	Collaborate with organizations and surveillance programs to identify populations in need
2.1 Work with a community or population to identify the determinants of health that affect them			Identify communities or populations they serve who are experiencing health inequities	Analyze current policy or policy developments that affect the communities or populations they serve	Work with a community or population to identify the determinants of health that affect them	Engage the communities or populations they serve about ways to improve health  Contribute to policy discussions relevant to the determinants of health

## The CanMEDS 2015 Milestones Guide

	Entry to Residency	Transition to Discipline	Foundations of Discipline	Core of Discipline	Transition to Practice	Advanced Expertise
<b>Health Advocate</b>						
<b>1 Respond to an individual patient's health needs by advocating with the patient within and beyond the clinical environment</b>						
1.2 Work with patients and their families to increase opportunities to adopt healthy behaviours	Describe the principles of behaviour change		Select patient education resources related to their discipline  Educate the patient and family about information and communication technologies to improve health		Work with the patient and family to increase opportunities to adopt healthy behaviours	Create health promotion and education resources
1.3 Incorporate disease prevention, health promotion, and health surveillance into interactions with individual patients	Describe the processes of disease prevention, health promotion, and health surveillance		Work with the patient and family to identify opportunities for disease prevention, health promotion, and health protection	Evaluate with the patient the potential benefits and harms of health screening	Incorporate disease prevention, health promotion, and health surveillance activities into interactions with individual patients	Champion education programs for disease prevention, health promotion, and health surveillance
<b>2 Respond to the needs of the communities or populations they serve by advocating with them for system-level change in a socially accountable manner</b>						
2.1 Work with a community or population to identify the determinants of health that affect them	Describe the health care system, identifying communities or populations facing health inequities
